

APPENDIX B

Secure Continuous Remote Alcohol Monitoring Alerts⁸

Alert	Description
Automated Facial Intelligence Pending Review	<i>Generated when SCRAMNET receives a test with a passed [breath alcohol concentration level, or BrAC] level but the facial recognition does not match.</i>
Device Battery Critically Low	<i>Generated when the battery in a SCRAM Remote Breath device has reached a level that requires immediate charging.</i>
Device Battery Low	<i>Generated when the battery in a SCRAM Remote Breath device is at a level that requires charging.</i>
Device Housing Breach	<i>Generated when the battery door is removed from a SCRAM Remote Breath device.</i>
Extended Missed Communication	<i>Generated when a [Secure Continuous Remote Alcohol Monitoring, or SCRAM] Remote Breath Device has not communicated with SCRAMNET for 24 hours. This alert would only come after multiple Scheduled Test Not Received Alerts.</i>
Failed Test	<i>Generated when a client provides a positive air sample with a BrAC above the acceptable threshold (.020).</i>
Incomplete Test	<i>Generated when a client does not complete a scheduled test. ie; did not blow long enough, did not blow into straw correctly.</i>
Missed Test	<i>Generated when a client does not take a scheduled test.</i>
Scheduled Test Not Received	<i>Generated when SCRAMNET does NOT receive a test result within 90 minutes of the scheduled time test.</i>

8. The alert definitions in this table are quoted from the Trial Court's *Electronic Monitoring SCRAM Remote Breath Program (SCRAM) Procedures*.
